

THE POLE SUPPORT MOUNT

The ROHN Pole Support Mount (PSM) can be mounted to the side or end of a building in easy one-step installation. Capable of receiving all sizes of the optional ROHN TVRO mounting poles and utilizing the ROHN TVRO ground base, your TVRO antenna will be elevated above common ground mounting hazards like trees, bushes, houses, etc... Additional features include:

- Hot Dip Galvanized after fabrication
- Will support most TVRO, PCS, Cellular and Microwave antennas
- Easy one-step installation
- Model: PSM
- UPS shippable

THE POLE WALL MOUNT

The ROHN Pole Wall Mount (PWM) is designed to support most Satellite, PCS, Cellular or Microwave antennas. With the use of 5' - 7' pipe, the ROHN PWM can be located so antenna and electronics can be easily reached and the pipe distance from the wall adjusts as needed. Additional features include:

- Hot Dip Galvanized after fabrication
- Accepts up to a 5½" O.D. pipe
- Optional mounting hardware and pipe available
- Ideal for a variety of antennas
- Easy to reach antenna from rooftop
- Model: PWM
- UPS shippable

WALL MOUNTS

The ROHN Wall Mount (WM212) is designed to support most Satellite, PCS, Cellular, or Microwave type antennas. The ROHN WM212 can be located so antenna and electronics can be easily reached and the pipe distance from the wall adjusts as needed. Additional features include:

- Hot Dip Galvanized after fabrication
- Includes 6' Long x 2" I.D. x 2¾" O.D. schedule 40 mounting pipe
- Optional items include installation hardware (ROHN part #HMK18M or B12 stabilizer straps)
- Available without B12 stabilizer straps
