

5 Foot Self Supporting Tower

PRODUCT FEATURES

- Portable or permanent tripod for smaller dishes or off-air antennas.
- Can be permanently bolted to building surfaces including concrete with the proper anchor bolts (purchased separately).
- Folds to a bundle that can be stowed in RVs or carried in passenger vehicles if a portable antenna stand is needed in mobile applications.
- Sealing material recommended for use under the feet of the tripod if mounted on a roof surface to prevent roof leaks. Sealing material EZP10, PV2626 or PV2632 flexible sealing pad material recommended.
- Not recommended for Ka satellite antennas.
