# TL1-4591 Crimp Tool
Installation Instructions

1. Put the plug into the crimp tool in the right position.

2. Squeeze the tool to push the contact blades into correct positions.

3. Push the metal strain relief down to hold the cable with foil screen or drain wire.

NOTE: Step 3 to 5 are for the shielded plug with metal strain relief only.

4. Place the metal strain relief at the right position.

5. Squeeze the tool again for holding the cable tightly and grounding.

6. Completion.
