These UV-resistant boots and cables are designed to last in the toughest environments and rated from -40C to +65C and is usable up to 12 GHz. They reduce time to tower by minimizing or eliminating the taping of connectors. The drop-down, hex-style connectors simplifies installation and allow for the connectors to be torqued appropriately. These short 14" LL142 cable assemblies are ultra-low loss and will maximize conductive power to the antenna. These cables can be used with KP's ProLine 11GHz Parabolic Antennas: KP-11PDFX-2 and KP-11PDFX-3.
